

COMPANY PROFILE

WHO WE ARE

Legacycreatives is a visual agency that handles both photography and videography for brands to help them stand out and tell their stories in a more engaging, professional and appealing way to their targeted audience. We have a wealth of experience of more than 10yrs in corporate world

Our Belief

The Person/Businesses that spoke the loudest got the attention in the 80'S , 90's but in the world today where we can skip adds on Facebook, YouTube (Online),change channels on TV & Radio or toss away a flier after being given (Offline) suggests that people (Clients) are ignoring marketing. Our attention span has decreased significantly.

Recent study shows what really works today is storytelling and talking hence it is out of this necessity that the kind of images we use both offline and online must stand out to grab the attention of the client for companies/ individuals to engage.

At Legacy photography, we believe Image Matters and therefore we aim to tell stories with our images by capturing the candid moments in a professional way as well as enhancing the client's brand.
